Re: Downers Grove Groundwater Investigation

Mr. Faryan:

This confirms our telephone conference of this morning, wherein we agreed that a representative from White Lake Building will meet you at 2537 Curtiss Street, Downers Grove, IL, at 9:00 a.m. tomorrow, pursuant to USEPA's recent request for access to undertake limited soil and groundwater testing as part of its effort to map area groundwater flow.

USEPA, not White Lake, has requested, and is solely responsible for the costs of, this testing and any resulting analysis or reporting, as well as costs of any claims by any USEPA employees, contractors, subcontractors, agents, or any other persons associated or affiliated with USEPA. Further, please note that White Lake reserves the right to access all test borings or wells on White Lake's property.

Sincerely,

LEWIS, OVERBECK & FURMAN
